## CALENDAR

if you click on the calendar tab you will see a calendar tab and an empty area below it.

You can select your date on the calendar and write your notes under it.

Clicking on each day loads your writings under that day. It is like an small desk calendar and make you able to remember what you need to remember in special dates.

## CREATE

clicking in the new button gives you a menu with an internal keyboard. You can type the name of your material to create . You must select which material you want to create. If you select the deck you it will create for you an empty flashcard set that you can handwrite on the cards some questions and answers and repeat the reviewing using the program's step learning algorithm.

If you select the notebook it will create for you and empty notebook that you can handwrite your class notes or other information on it.

Clicking the new button again hides the panel and clicking on the create button will create what you want.

## NOTEBOOK

if you create a note book you will see this window. In three bars on top of the page you can see the total number of pages on the first bar and the current page in the third bar. The second bar is useless in this situation. In the right side of your page you can see four buttons. First two is for navigating among pages.

The S button is for early saving pages in some situations that the data is very important. And the R is for refresh full screen.

## CREATE AND REVIEW HANDWRITED FLASH CARD

if you create a flash card set or open one of them you can see this page. In the review tab you can review your cards and in the add tab you can add new cards. If you create a deck for first time you can not see the review tab until you open it after adding some cards.

On the top of page the first bar shows you new cards and second shows you early repeat cards that you were unable to remember it. The third is the number of due cards that you should review this day. The system opens a few cards in one session so for example 5:6 shows you that the total new is 6 and 5 new card is open for this session.

In the button you can see five buttons.

Show answer shows the back of your card that contains the answer.

Repeat means you need further repeats for this card in this day.

Good, easy and very easy is when you answered the card and will program for later review based on the hardness of remembering.

## ANKI DECKS

if you open an anki deck you will see this page. This is completely similar to the last page but you have not add tab. You can only review the anki cards and can not add any card to them.

The screenshot shows the Anki review interface. At the top, the word "Dialog" is centered. Below it, there are three boxes: a yellow box containing "14:139", a cyan box containing "0", and a cyan box containing "15:14". The main area is divided into two sections. The top section contains the word "Onze" in the center. The bottom section contains the word "Eleven" in the center. On the right side, there is a vertical stack of buttons: "Decks", "Calendar", "review" (which is highlighted with a blue border), and "About". At the bottom of the interface, there are four buttons: "repeat (ok)", "good (V)", "easy (<-)", and "ryeasy (<-)". To the right of these buttons is a cyan box containing the letter "R".

## INSTALLATION

copy the floox folder on your sd card  
copy the floox.oar wherever you want on your onyx boox  
run the floox.oar

## UPGRADE

for upgrading from version 1 to 2 you must overwrite the floox folder of the version 2 on the floox folder of version one on your sd card  
and also overwrite the floox.oar application in your onyx boox

## USING ANKI LISTS

goto your anki application and save as your deck to the floox folder of your sdcard with .anki extention
